# FIRST CONTACT WITH R

## Beginner Workshop

16 - 17 November 2018

---

Instructions for installing the R software and download the workshop materials.

---

### Step 1: Download R & R Studio

---

R is the software that execute the text mining script. You can find it here:

<https://www.freeststatistics.org/cran/>

R Studio is a free and handy environment for executing R scripts. You can find it here:

<https://www.rstudio.com/products/rstudio/download/#download>

You just need to download the versions of R and R studio that match your OS (Windows, Mac or Linux) and install both R and R Studio like any other program.

---

### Step 2: Download workshop materials

---

The **workshop materials** include datasets and R scripts. You can find the materials here:

[https://github.com/DigitalSocietySchool/R\\_FirstContact](https://github.com/DigitalSocietySchool/R_FirstContact)

Just download the files with the “Download Zip” option (as in the screenshot below) and unzip the files in any folder that is convenient for you.
